FlexStream™

Document Enhancement

A Complete Solution for Document Processing

FlexStream is a document processing solution, unmatched in its versatility and performance. FlexStream lets you add scancodes to your documents to be used by your inserter and manipulate and enhance the contents of your mailing. With FlexStream you can:

- Increase the integrity of your mailings by adding scancodes that can be used by inserters.
- Reduce postage costs by combining documents intended for the same recipient into a single mail piece.
- Save postage by using the optional postal presort modules.
- Turn your document into a marketing tool by adding conditional text, graphics and barcodes and by utilizing selective feeding.
- Eliminate the costs of preprinted forms by adding overlays and digital inserts to your documents.
- Convert traditional simplex printed documents to duplex to reduce paper costs and provide additional postage savings.
- Save costs by e-mailing all or a selection of your documents.

FlexStream loads existing PDF files and runs independently of existing software, so there is no need to change existing systems. Files are processed at high speeds and the result may be printed on any printer.

There is no need for specialized personnel to operate the software. FlexStream is easy to use because of its intuitive user interface incorporating ribbons, tooltips, context sensitive help, and wizards that take users through more complex tasks. Because of its close similarity to the latest Microsoft Office, it is very easy to understand FlexStream's user interface and operation. The FlexStream software is available in several languages.

FlexStream comes in three different editions so, depending on your production requirements, you can select a FlexStream solution that fits your needs:

■ FlexStream Basic

FlexStream Basic is the solution for users who need to add scancodes (OMR, 1D or 2D BCR) to PDF files without the need to change the existing documents.

■ FlexStream Advanced

In addition to adding scancodes, FlexStream Advanced offers extended document manipulation and enhancement features for users who need to add additional contents or want to change the layout of documents.

■ FlexStream Professional

FlexStream Professional adds document management features like digital inserts, e-mail capabilities, archiving documents, and closed loop processing.

FlexStream can be extended with with additional services supporting Secure & Tracked email and to prepare mail according to the USPS postal standards.

■ USPS Mail Processing

A USPS postal module is available to handle address correction and encoding. Next to this, FlexMail presort modules are available to sort your mail and produce all necessary output to meet mailing regulations to get maximum postage discounts and fast and accurate delivery of your mail.

■ Secure & Tracked Email

FlexStream offers a robust secure and tracked email service for sensitive business documents. FlexStream makes it easy to select the documents to be emailed, send the emails with the confidence that they will reach their intended recipients without passing into the wrong hands, and offers extensive tracking, audit, and follow-up functionality.

FlexStream Features

FlexStream offers all functionality to manipulate your document files, the logic to define which pages make up a document and which documents can go together in the same envelope. You can add scancodes for your inserter and further enhance your documents with texts, graphics and additional barcodes. Output can be printed or emailed and the documents can be prepared for archiving.

Document File Processing

- Open one or more document files in PDF or PDF/A format. The files can be in different layouts to combine different documents in a single mail piece.
- Change the input document to Duplex, remove leading and trailing pages and scale and move the contents of the pages.
- Add digital inserts. These are pages from PDF-files that are (conditionally) added to the documents, before the documents are printed. Digital inserts can be conditional and variable, so inserts can be added depending on the contents of the main document.
- Add envelopes to sets (includes RISO WEF support).
- Use templates for recurring jobs, eliminating the need to set up jobs that are run on a regular basis.

Document Breaks and Grouping

- Extract text, graphics or barcodes from your PDF documents to be used for further processing in print objects or to make comparisons and decisions inside the program.
- Define breaks that mark the end of one document and the beginning of another.
- Group documents for the same recipient into single mail items (sets) based on data contained in the documents.
- Sort sets and documents within a set in the required order. E.g. sort your sets on postcode and the documents in a set on invoice number.
- Job splitting based on any condition (e.g. set size) to divide a job in batches to be handled separately.
- Presort your mail pieces to meet mailing regulations and get maximum postal discounts.
- Previewing results of breaking, grouping, sorting and conditional scancode marks in a datasheet and job summary.

Scancodes

- Add scancodes for your inserter. Pre-defined scancodes for inserters of all major manufacturers are included in the program. FlexStream supports OMR and scancodes based on 1-D and 2-D barcodes.
- Define custom scancodes if necessary.
- Guides help you in positioning the scancode according to the specifications of your inserter.

Document Enhancement

- Add any fixed or variable text based on a condition.
- Supports over 80 different barcodes, including 2-D barcodes and postal barcodes.
- Include fixed and variable graphics in a wide variety of formats.
- Add postal indicia and postage paid imprints.
- Add overlays to your documents.

Output

- Print on any Windows supported printer or output to PDF.
- Dynamic (conditional) input paper tray selection.
- Print output on multiple printers.
- Export data from the generated datasheet.
- Remove documents from the print stream and email them instead.
- Archive digital copies of the (e-)mailed documents in PDF format.

USPSTTM Mail Processing

Flex Systems' USPSTTM Mail processing module allows for comprehensive address quality and mail processing features. The module gives you access to services such as CASS, NCOA, DSF2, Presort and more, enabling you to generate the highest possible discounts through the USPSTTM.

- CASS CertifiedTM for address correction - Standardize abbreviations and address formats to USPSTTM guidelines, correct the spelling of streets and cities and verify deliverability, includes DPV®, LACSLink® and SuiteLinkTM processing. Add missing postal data including nine-digit ZIP® codes, eLOT® and carrier route numbers, delivery points and more.
- Move Update service - Process lists against the limited 18-month or full 48-month NCOALink data set. NCOALink processing meets USPSTTM Move Update requirements for First-Class Mail® and Standard Mail® discounts.
- Dedupe - Check for duplicates within your file. Optionally, you can check your addresses against nationally compiled lists for 'Do Not Mail', Prison and Deceased suppression.
- PAVETM certified postal presorting - Sort address lists for the lowest possible postal rates and generate all required USPSTTM documentation, reports and postage statements. The service includes support for First-Class Mail®, Standard Mail®, Periodicals and Bounded Printed Matter.

Flex Systems' USPSTTM Mail processing module is powered by TEC Mailing Solutions, the leader in enterprise grade SaaS for address hygiene and presort solutions. The services can be accessed through FlexStream without having to install additional software and data files on your computer.

- No software to load, No licensing to buy!
- No updates to install, always up-to-date.
- No special hardware required.

Secure & Tracked Email

FlexStream offers a robust secure and tracked email service for sensitive business documents. FlexStream makes it easy to select the documents to be emailed, send the emails with the confidence that they will reach their intended recipients without passing into the wrong hands, and offers extensive tracking, audit, and follow-up functionality.

- Select documents for emailing based on document contents or data contained in a database.
- Design personalized emails according to company house-style, with links, buttons etc.
- Military grade levels of encryption during transfer of documents.
- Recorded date and time of sending, delivery, opening of email and downloading of the document.
- Select follow-up action based on email status of a document for a recipient.

World Class Email Security and Tracking

FlexStream uses the SSLPost service for its secure and tracked email. This service is a sophisticated system of processes, which deliver electronic mail in a highly secure environment ensuring end-to-end encryption and maximum security. The service is deployed as a public SaaS solution.

- Significantly reduce costs by saving printing, material, and postage.
- No investment in email infrastructure required, no email server needed. No special setup, the service can be used without intervention of IT specialists. No worries about becoming blacklisted when sending large amounts of emails.
- No workflow intervention. Processes PDF-documents generated by any system. Complete flexibility in selecting documents to be emailed.
- Prevents any blocking by the recipient's email server because of file attachment size limits or other email settings.
- Track and trace sent emails with no recipient intervention. Recording of date and time the email was sent, delivered, and when the attached document was opened and read.
- Easy to use for the recipient. Looks like a 'normal' email and can be used without additional software installed.

FlexStream Feature Comparison

Basic

Advanced

Professional

Input files

- Open (multiple) PDF files of any number of pages
- Support of different layouts for each input file
- Digital inserts (conditional)
- Add envelopes to sets (includes RISO WEF support)

Read and manipulate Data

- Read text from input document
- Check for images on input document
- Read/decode barcodes from input document
- Generate dates and times in any format
- Generate contents for postal barcodes and indicia
- Define functions in Visual Basic
- Use/add look-up tables for translations and file look-up

Grouping and sorting

- Define document breaks
- Group documents in sets
- Overcount splitting
- Overcount separation
- Order documents within sets
- Sort sets
- Split job in multiple groups (e.g. based on set size)
- Summary report
- Operator instructions

Scancode generation

- Select and configure inserter properties
- Define divert and feed options
- Create Scancodes (OMR, 1D Barcodes, 2D Barcodes)
- Scancode design forms for correct Scancode placement

Document Layout

- Remove cover (leading and trailing) pages from input documents
- Document scaling (fit to paper) and moving of contents.
- Duplexing of document
- Add overlays to the document (front- or backside)
- Blank out areas
- Add (conditional) shapes
- Add (conditional) text
- Add (conditional and variable) pictures
- Add (conditional) barcodes
- Add postal indicia

Preview

- Preview processed documents per page, document or set.
- Dataheet view displaying all document data in table format

Printing

- Print on any windows supported printer
- Print/save project to PDF
- Dynamic input paper tray selection
- Multiple printer support
- Closed loop processing

Other output

- Email all or selection of the documents
- Save documents for archiving

Add on services

- USPS Mail Processing
- Secure and Tracked Email

Licensing and Maintenance

Licensing – Buy Only What You Need

FlexStream is available in three editions. This gives you full flexibility in choosing the functionality you need. FlexStream is licensed per PC. Discounts are available for multiple installations.

You can upgrade at any moment you want. Just call your supplier. Within minutes you will be able to use the edition you need.
FlexStream Maintenance – For On-going Value

FlexStream Maintenance – For On-going Value

To be sure that you always have the latest versions of FlexStream, Flex Systems offers FlexStream Maintenance. Subscribers will receive any upgrade or new version of the FlexStream software completely for free during the maintenance period. On top of this, maintenance entitles you to direct support from Flex Systems, the developers of FlexStream.
